Who is EV4All?

EV4All was started in 2021 by friends and Executive MBA classmates who formed a team for UCLA Anderson's Business Creation Capstone course. Being EV drivers themselves, they were frustrated about the slow growth of the EV charging infrastructure in California. Their business idea focused on reducing the EV charger installation pain points for commercial property owners across the greater Southern California area. The team went on to win the Gloria Appel Entrepreneur Prize and the Anderson's School of Management's Entrepreneurship Excellence Award for their dedication and application of key business strategies and concepts.

Shortly after graduating, EV4All gathered a team of industry-leading experts in from the EV, Electrical Infrastructure, and Commercial Real Estate spaces to challenge the EV charging industry leaders by democratizing access to EV chargers. Focusing on Multi-Family Residential, Commercial Office, Government Facilities and Public Spaces, the team is bringing EV charging to where their customers live, work and play!

Our Product

EV4All provides a turnkey EV Charging solution for clients at ZERO cost to them! * We take care of everything, including site evaluation & planning, equipment selection, site design & installation, permitting, testing & certification, maintenance & servicing, and network access. We do the hard work, so you don't have to. We are charger agnostic, allowing us to custom design every project, stepping away from a cookie-cutter 'solution.'

Minority – Female – Veteran Owned!

Customer-Centered Focus

At EV4All, we know that the EV charger process is complicated. We focus on educating our customers on the best product and installation for you. We explain the process and answer your questions, every-step of the way.

Professional Design and Installation

We only use quality EV charging equipment that meet stringent durability and performance standards. We use the best certified electricians with years of commercial electrical and EV charger installation experience.

Worry-Free Service and Maintenance

While most charging companies are hard to find when things go wrong, our maintenance and servicing programs ensure that your chargers are always at peak performance. Our dedicated customer support and service teams are only a phone call away.

What is... The EV4All Difference?

We take the mess that is EV charging and simplify it. We turn a complicated system into a step-by-step process that it easy to understand.

Our process is straight-forward and transparent. We provide a product and service that meets your needs without any hidden agendas.

We provide excellent customer service from group of dedicated professionals when you need us the most ... after the installation!
